Brake Assembly Upgrade Kit

Canrig has designed a new brake assembly that raises the calipers and brake disk. The design change significantly decreases the time to service the brake assembly.

Features for this upgrade kit:

- Improved access to the brake calipers allows for shorter times to replace brake pads and caliper assemblies.
- Improved visibility of the hydraulic fittings and tubing aids in troubleshooting and repairing hydraulic leaks.

Affected Models

Top drive models: 1235AC-500, 1250AC-681, 1250AC-865, 1275AC-681, 1275AC-865.

Replacement Information

Contact RIGLINE 24/7™ Support to order the brake assembly upgrade kit, see Table 1 below.

Table 1: Brake Assembly Upgrade Kit Options
